A Technical Seminar report on

EVOLUTION OF MOBILE TECHNOLOGIES FROM 1G TO LTE

Submitted in partial fulfillment of the requirements

for the award of the degree of

BACHELOR OF TECHNOLOGY

in

Computer Science & Engineering

by

K.PRANEETHA

(164G1A0569)

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

(B. Tech program accredited by NBA)

SRINIVASA RAMANUJAN INSTITUTE OF TECHNOLOGY: ANANTAPURAMU

(Accredited By NAAC With ‘A’ Grade, Affiliated To JNTUA, Approved By AICTE, New Delhi)

2019-2020

SRINIVASA RAMANUJAN INSTITUTE OF TECHNOLOGY: ANANTHAPURAMU

(Accredited by NAAC with ‘A’ Grade, Affiliated to JNTUA, Approved by AICTE, New Delhi)

Rotarypuram Village, B.K. Samudram Mandal, Ananthapuramu – 515701

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

(B. Tech Program accredited by NBA)

Certificate

This is to certify that the Technical Seminar report entitled EVOLUTION OF MOBILE TECHNOLOGIES FROM 1G TO LTE is the bonafide work carried out by **K.PRANEETHA** bearing Roll Number **164G1A0569** in partial fulfilment of the requirements for the award of the degree of **Bachelor of Technology** in **Computer Science & Engineering** during the academic year 2019-2020.

Signature of the Guide

Mr.M.Narasimhulu Mtech
Assistant professor

Head of the Department

DR.G.K.V. Narasimha Reddy Mtech
Assistant professor&HOD.

Date: 02-03-2020

Place: Rotarypuram

ACKNOWLEDGEMENT

The satisfaction and euphoria that accompany the successful completion of any task would be incomplete without the mention of people who made it possible, whose constant guidance and encouragement crowned my effort with success. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

It is with immense pleasure that I would like to express my indebted gratitude to my Guide **Mr.M. Narasimhulu, Assistant professor, Computer Science and Engineering**, who has guided me a lot and encouraged me in every step of the seminar work. I thank him for the stimulating guidance, constant encouragement and constructive criticism which have made possible to bring out this seminar work.

I am very much thankful to **Dr.G.K.V. Narasimha Reddy, HOD, Computer Science and Engineering,** for his kind support and for providing necessary facilities to carry out the work.

I wish to convey my special thanks to **Dr. T.Hitendra Sarma , Principal** of **Srinivasa Ramanujan Institute of Technology** for giving the required information in doing my seminar work. Not to forget, I thank all other faculty and non-teaching staff, and my friends who had directly or indirectly helped and supported me in completing my seminar in time.

I also express our sincere thanks to the Management for providing excellent facilities**.**

Finally, I wish to convey my gratitude to my family who fostered all the requirements and facilities that I need.

K. PRANEETHA
(164G1A0588)

ABSTRACT

1G refers to the first generation of wireless celluar technology. These are the analog telecommunication standards that were introduced in the 1980s and continued until being replaced by 2G digital telecommunications. The main difference between the two mobile celluar systems(1G and 2G),is the radio signals used by 1G networks are analog, while 2G networks are digital.

2G (or **2-G**) is short for second-generation cellular network. 2G cellular networks were commercially launched on the GSM standard. 2G technologies enabled the various networks to provide the services such as text messages, picture messages, and MMS (multimedia messages). All text messages sent over 2G are digitally encrypted, allowing the transfer of data in such a way that only the intended receiver can receive and read it.

2G (or **2-G**) is short for second-generation cellular network. 2G cellular networks were commercially launched on the GSM standard. 2G technologies enabled the various networks to provide the services such as text messages, picture messages, and MMS (multimedia messages). All text messages sent over 2G are digitally encrypted, allowing the transfer of data in such a way that only the intended receiver can receive and read it.

4G is the fourth generation of broadband cellular network technology, succeeding 3G. A 4G system must provide capabilities defined by ITU in IMT Advanced. Potential and current applications include amended mobile web access, IP telephony, gaming services, high-definition mobile TV, video conferencing, and 3D television.
